

Simulink Support Packages Installation Guide

1. Purpose

The purpose of this guide is to provide a *step-by-step* procedure to install the two Simulink Support Packages:

- a. Simulink Support Package for Arduino
- b. Rensselaer Arduino Support Package Library (RASPLib)

These packages will be used in the PROCTECH 3CT3 labs to enable you to create and run Simulink models on Arduino boards.

2. Installing Simulink Support Package for Arduino

1. Launch MATLAB
2. Click the Add-Ons icon from the toolstrip.

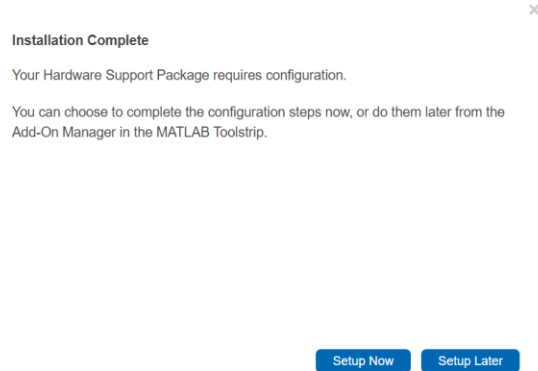

3. Search for the **Simulink Support Package for Arduino**.

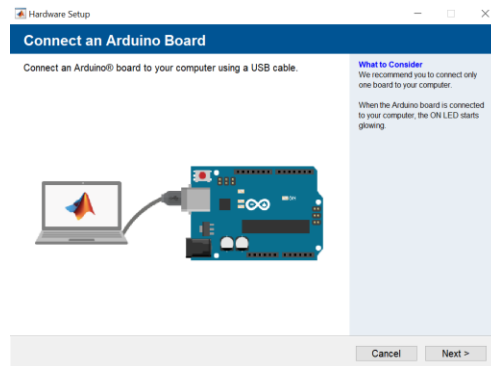

4. Click on the support package link
5. Click install, next, and accept.

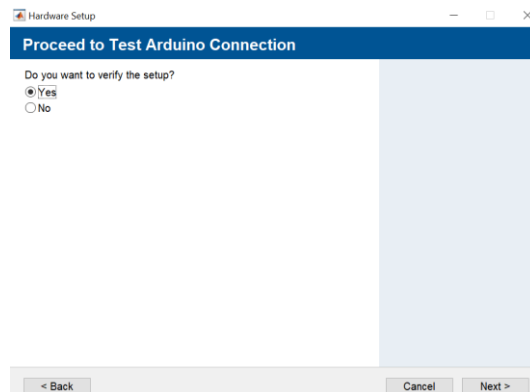

6. After completing the installation, click **Setup Now**.

7. When prompted, **connect** your Arduino to the USB of your computer and press **Next**.

8. Select Arduino Mega 2560 and the correct com port.
9. Choose to verify your setup and click Next.

10. Press on the Test connection Button.

Hardware Setup

Test Arduino Connection

Board: Arduino Mega 2560(COM5)

Test Connection

Build status

Download status

What to Consider
Test Connection does the following:
1. **Build** checks if the third-party tools are installed appropriately.
2. **Download** tests if the connection between your computer and the Arduino board is proper.

After the test connection is successful, the on-board LED starts blinking. Click **Next** to continue.

< Back Cancel Next >

11. Wait until both Build Successful and Download Successful are shown in green

Hardware Setup

Test Arduino Connection

Board: Arduino Mega 2560(COM5)

Test Connection

✓ Build successful

✓ Download successful

What to Consider
Test Connection does the following:
1. **Build** checks if the third-party tools are installed appropriately.
2. **Download** tests if the connection between your computer and the Arduino board is proper.

After the test connection is successful, the on-board LED starts blinking. Click **Next** to continue.

< Back Cancel Next >

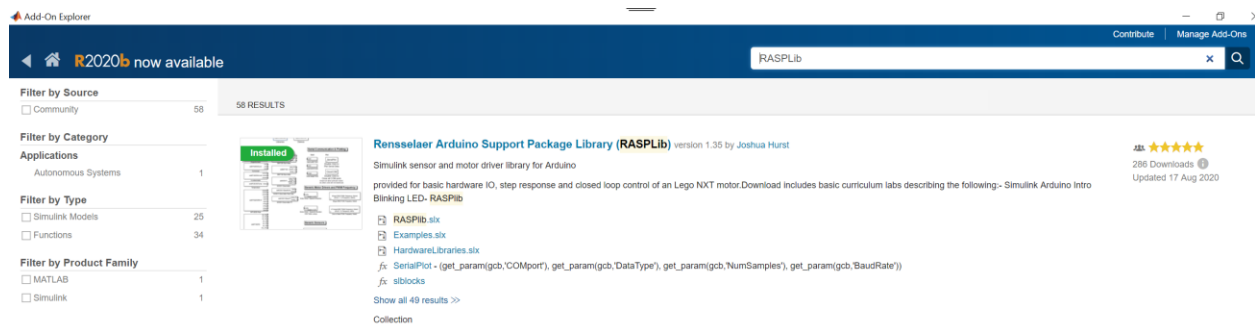

12. Click **Finish**

3. Rensselaer Arduino Support Package Library (RASPLib)

1. Launch MATLAB
2. Click the Add-Ons icon from the toolstrip.

3. Search for the **RASPLib**.

4. Click on the support package link and follow the installation instructions.
